GUIDANCE

Vision

Transform lives through learning

Values

PASSIONATE - We are passionate about inspiring young people, adults and our Purple People to be their best and we take pride in creating a positive learning environment to fulfil their potential.

UNSTOPPABLE - We are unstoppable in our quest for the pursuit of excellence. We are dedicated and resilient to develop ourselves and our learners.

RIGHT - We treat each other with respect and strive to do the right thing through insight, inclusion, honesty, growth and trustworthiness.

PARTNERSHIPS - We support the people surrounding us in our everyday lives, building effective partnerships with businesses, learners and all stakeholders where we can pass on our knowledge and skills to help them meet their goals.

LEARNERS - Learners are at the centre of everything we do and we are driven to provide life-changing and life-long learning for them.

EMPOWERED - We encourage our Purple People to be independent and autonomous to maximise their goals surpassing their barriers and targets. Feel it, believe it, live it.

Tone of voice

Our tone of voice takes its direct influence from our core values. We are passionate about people and learners and are driven to get the best out of everyone by understanding them. We are caring and supportive, as well as being determined and striving for growth. We talk with purpose and enthusiasm in a way that connects and empowers people.

Innovation is at the heart of Learning Curve Group and we're always thinking about what's next!

December 2023	Whole Document	Review and split BCP and Incident/Crisis management to own sections
December 2024	Whole Document	Annual review

INTRODUCTION

Learning Curve Group (LCG) is one of the largest national training providers in the UK, providing education and training nationally. All companies within the LCG family uphold the same company Vision, Mission and Core Values and follow our group policies and procedures.

This policy sets out the means to provide a flexible response framework so that Learning Curve Group can:

- Respond effectively to a major disruptive occurrence (incident management) across the business.
- React appropriately to changes in key staff that would potentially impact on the success of the business.
- Maintain delivery of critical activities during an incident (business continuity).
- Return to business as usual (resumption and recovery) as soon as feasible after an incident.

Applies to

This policy applies to all our people, premises and functions and should be read in conjunction with our individual departmental/site business continuity plans and emergency procedures and used in conjunction with any property owner or shared site procedures that may also apply.

Reason for policy

This Business Continuity Policy (BCP) details steps that should be taken before, during and after any disruptive occurrence to maintain the delivery of critical services and financial viability of the business. The impact of any serious disturbance may affect the business delivery of education, safety/welfare of colleagues and learners, it may have financial consequences, reputation damage or possible environmental consequences. The main objectives of this policy are:

- To safeguard the safety and welfare of colleagues, learners, and visitors and where applicable the general public.
- To resume provision of services (internally and externally) at the earliest opportunity and, where possible, secure a continuation of learning for learners.
- To maintain the identity of the company and limit financial consequences.
- To limit any reputational damage.
- To return to business as normal as soon as possible after the incident and limit the impact on our customers and learners.

This policy and procedure do not form part of your terms and conditions of employment and can be changed at any time as we deem appropriate.

POLICY

Purpose

To provide guidance and support to enable us to tackle the impact of severe disruptions due to a variety of one-off, but credible, causes. It will co-ordinate the response of all our departments alongside their individual business continuity plans to ensure business critical functions are reinstated as soon as possible, while full restoration of all services is planned and implemented on a concurrent basis.

Circumstances

The policy will be activated in response to an incident causing significant disruption to the business, particularly in delivery of key or critical activities e.g.

- Loss of key staff or skills due to above normal levels of absenteeism e.g., illness (pandemic).
- Loss of critical staff where recruitment and replacement is challenging.
- Total or partial loss of utility provision or critical systems prohibiting delivery of services.
- Denial of access to facilities due to damage or landlord restrictions.
- Loss of a key resource delivering critical support.
- Serious injury or death.
- Release of toxic or harmful materials in the vicinity and possible environmental incident.
- Sub-contractor issues that may affect the contract and learners enrolled where LCG will take over delivery and support fully.
- Incident within the area that may prohibit access, such as a terrorist attack local to academies and restricted travel in and out of areas and public transport affected.

The above list is not exhaustive, and other circumstances may trigger the plan to be activated.

Business Recovery timescales

In the event of a situation which threatens business continuity, there are deemed to be several business functions which must be maintained or reinstated as a priority. A Recovery Time Objective (RTO) has been assigned to each of these functions as shown below.

Function	Recovery Time Objective (RTO)
Leadership – Business Critical Response Team	2 hours
Safeguarding and Prevent services	2 hours
Health and Safety assessment	1 day
Communication to Stakeholders/Learners/Employers	1 day
IT recovery assessment	1 day
Insurance assessment	5 days
Financial transactions	5 days
HR	4 hours
Website/social media	4 hours
E Portfolio	1 day
Continuation of Learning	2 days

Some of the areas listed may be suspended during any disruptive occurrence, however, they must be reinstated as soon as is viable based on the RTO listed here. Any arrangements to adjust staffing levels in different areas will be by negotiation with line managers and authorised by the appropriate member of the Executive Team.

Escalating a serious incident

All serious incidents should be reported to the relevant Executive Director or Head of Risk immediately afterwards who will then inform relevant staff to respond. If the disruption has resulted in the loss of access to one of our sites, an Emergency Response Team (ERT) meeting should be held at one of the other company sites nominated by the Chief Executive Officer (CEO) or designated deputy. Any out of hours incident would, in the first instance, normally be reported via internal monitoring systems to the on-call security response teams.

Responsibility for Plan Activation

A nominated ERT will be activated by the CEO or designated deputy in the CEO's absence, as detailed in the Incident Response Policy as soon as possible after the incident. A member of this team will be responsible for standing down on this plan once everything is returned to business as usual. Members of the ERT and any deputies will hold site specific information for property owners, IT managed services and other business critical information that may need to be accessed during any event. This must be always kept secure and checked for any changes on a 6-monthly basis by each Directors responsible for business specific areas and supported by the Head of Risk.

Critical Roles

LCG identifies critical roles in the business that would have a significant impact on the functions of the company should they cease or individual leave the business. These include but are not limited to:

- Executive Directors
- External Clients Services Director
- Heads of Department
- Subcontract Manager
- Bid writers.
- Senior Designated Safeguarding Leads and Designated Safeguarding Leads.

LCG has succession plans and/or identified people who will pick up a critical role should it be required. In line with our values, we endeavour to empower our people and provide every opportunity for training, job shadowing and career progression which is supported by our Purple People (Training) Academy. We believe in growing our own specialists ready to take on the challenge of a new role and continue to create a working culture that successfully promotes personal and professional development.

Military Academies

Within our Military Academies we follow the strict practices of the Ministry of Defence (MOD) whilst using their sites and the incident officer would consult with the MOD, should there be any critical incidents. The military works on the 'alert state for the whole of the UK (the threat level from Northern Ireland will remain separate), but threats may be specific to the site and intelligence led information. The levels are:

- Critical – an attack is highly likely in the future.
- Severe – an attack is highly likely.
- Substantial – an attack is likely.
- Moderate – an attack is possible but not likely.
- Low – an attack is highly unlikely.

Each of our military academies have an alert board on entrance and exit of the camp. Academy Managers are briefed and pay attention to the alert state and if there are any changes or if specific intelligence comes in, guidance is sought from the MOD. LCG will work with the Reserve Forces' and Cadets' Associations (RFCA) to support in the re-locating of our learners to a temporary venue, should it be necessary. Other establishments may be used if the threat/incident is deemed long term.

Individual Departmental Business Continuity Plans

Each department has their own Disaster Recovery plan that describes how key incidents will be managed and details:

- How information sharing will happen during/after the incident to individual teams and the wider business.
- Alternative premises that can be used short/long term until normal service is resumed.
- Key staff who will be responsible for decision making in relation their own departments.

Upon activation of this plan, the Chief Executive Officer, or their nominated deputy, will trigger the ERT to undertake their responsibilities. The primary objective of this team is to manage the developing situation and minimise harm and danger to:

- Colleagues
- Learners
- Visitors to the site/s
- The building, contents, and other assets
- General public

Each of the plans are kept in a SharePoint site and a hard copy is held by the relevant departmental managers should access to the SharePoint site be compromised. The plans will be regularly updated should any changes occur.

Emergency Site File

Any evacuation is dealt with via our internal fire evacuation procedures or on advice from the emergency services/property owner. The emergency file should be stored in the reception/admin office of each site. Members of the ERT will also have site specific information kept in a separate secure location and an online BCP folder which can be accessible when required. The on-site file should contain the following items:

- Emergency telephone numbers
- List of on-site fire wardens
- List of on-site first aiders
- Floor plans for LCG specific areas and associated areas if required.
- Disaster recovery plan
- Current Personal Emergency Evacuation Plans (PEEP) for site staff, learners or clients on site requiring one.

- Run, Hide, Tell Guidance. [RUN HIDE TELL | ProtectUK](#)
- Citizen Aid App and printed actions on pages. The [citizenAID App](#) is a 'life-saving' app

Any other critical items, e.g., up to date contact information for staff, learners, any other critical parents/carers, will be available via any internet-enabled computer and kept updated by the Chief People Officer (Exec) Director of Funding and MIS. The file should be taken out of the LCG premises by the nearest person, only if it is safe to do so. The emergency file will be checked bi-annually for accuracy of information by the Academy Managers and supported by Health & Safety Team.

Testing the plan

This policy will be tested annually alongside the Incident Response policy by using the tabletop method. This tests the theoretical ability of all areas across Learning Curve Group to respond to a business continuity incident.

It centres on role-playing and will be done in a training room. The tabletop exercise is a discussion, during which personnel review their ERT-defined roles and discuss their responses during an adverse event simulation. This testing will be carried out annually in line with LCG yearly review of all business continuity and disaster recovery planning.

This has been reviewed and approved by our CEO, Brenda McLeish OBE DL

DEFINITIONS

Disaster Recovery

Involves a set of plans, tools, and procedures to enable the recovery or continuation of vital technology infrastructure and systems following a natural or human-induced disaster.

Critical Activities

Business activities and processes that must be restored in the event of a disruption to ensure the ability to protect the organisation's assets, meet organisational needs, and satisfy regulations as well as contractual requirements, including sub-contractors assigned on behalf of LCG business. Personal data is secured and if any potential breach of security reported as required through [Data Protection Submission Form](#).
